Test conditions for the account module for TripAdvisor

Epic 1. User Management:

1. As a user I want to register for an account.

- Verify that the user can successfully register for an account with valid information.
- Verify registration fails with missing first name
- Verify registration fails with missing surname
- Verify registration fails with invalid password
- Verify registration fails with password to short

2. As a user I want to login

- Verify that the login page is accessible.
- Verify that the user can log in with correct credentials.
- Verify the "Remember Me" functionality.
- Verify that login fails with incorrect username/email.
- Verify that login fails with incorrect password combination.
- Verify account access across multiple browsers (e.g., Google Chrome, Mozilla Firefox and Opera) to ensure consistency and responsiveness.
- Verify that the platform supports social login via Google
- Verify user can successful login using Google credentials
- Ensure appropriate error messages are displayed if Google login fails

3. As a user I want to manage account settings

- Test the ability to update account information (e.g., name, username, current city, website, about you).
- Ensure that users can set preferences (e.g., region& language; currency)
- Test the ability to upload and change profile photo.
- Test the ability to upload and change cover photo.
- Check if changes to profiles are displayed correctly across the platform.
- Check if user can add photos to share travel advice
- Check if user can add a review

- Check if user can see his badges
- Test the ability to delete an account.
- Verify that the user can access the password reset functionality.
- Verify that the user can access the account recovery functionality.
- Test the possibility to turn on notifications.
- Test the possibility to turn on notifications.
- Check if the user can add payment information

Epic 2. Booking & Trips

1. As a user I want to manage a booking

- Test if the user can search for a hotel
- Test if the user can search for availability of the desired hotel
- Test if the webpage redirects to an external booking page

2. As a user I want to manage trip page

- Test if the user can create his own trip
- Test if the user can add hotels/restaurants/attractions to his own trip list
- Test if the user can cancel the trip folder
- Test if the user can add dates to the trip folder
- Test if the user can cancel the items from the trip folder
